

Fostering for Change in Research & Education in Vietnam

VIETNAM EDUCATION DIALOGUE
Ho Chi Minh City, July 31 - Aug 01, 2014

Vu Duong
Viet Nam National University HCM - John von Neumann Institute

Education is more than **what** you are taught
but **how** you are taught

includes coaching on independent thinking, creative and critical thinking, scientific methods, social responsibility, ethics & social behaviors, leaderships development, etc..

From Teaching to Coaching. Why?

“Learning is much more than accessing content. In the 21st century, learning is a complex blend of skills, competencies, and the will to continue learning throughout life.

These skills and competencies include the **ability to think critically** and **solve complex problems**, **work collaboratively**, **communicate effectively**, and **pursue self-directed learning** or metacognition.”

Diana Oblinger

EDUCAUSE Review, Vol. 45(5), 2010, pp. 4-6

“An university lecturer must be an active **scientist**,
the ***transmitter-of-the-fire***, and an **intellectual...**”

In “*The Tao of Teaching*” - Prof. Phan Thanh Binh (Nov, 2012)

But being a scientist,
doing research in Viet Nam is yet a big
challenge, isn't it?
